OBJECTIVE

Seeking an **Engineering or Field-Related Position** with an oil and gas company to leverage analytical, leadership, and organizational skills acquired in consecutive internships with **EOG Resources as a Drilling Engineer and Production Engineer**. Frequently praised as proactive by my peers, I can be relied upon to exceed expectations.

EDUCATION

Texas A&M University, College Station, TX..... May 2021
B.S. in *Petroleum Engineering*
Major GPR: 3.61/4.0 Cumulative GPR: 3.43/4.0

WORK EXPERIENCE

EOG Resources: San Antonio, TX..... May 2020-Aug 2020

- Analyzed historical wells to find hundreds of pack-off data samples.
- Spearheaded machine learning pack-off detection project along with information systems intern.
- Detected real time pack-offs using an intern-led machine learning system.
- Constructed cost analysis of pack-offs in San Antonio division.
- Learned well planning procedures for San Antonio division.
- Roustabout on drilling rig for 3 weeks.

EOG Resources: Fort Worth, TX May 2019-Aug 2019

- Monitored different cleanouts in order to design “Venturi Clean Out Tool” test.
- Designed a test to measure effectiveness of low bottom hold pressure cleanout tools in Production Tech. Center.
- Sourced triplex pump rental from vendor to run cleanout tool test.
- Designed connection to be created for cleanout tool test.
- Formulated a cost analysis for venturi cleanout tools in relation to other cleanout methods.
- Collaborated with vendors to comparatively discuss their cleanout tool design to find most effective tool.
- Assisted with frac plug test
